

Tamper-Proof Key Rings®

The Industry Standard Among Security Professionals

Strict tolerances provide you with the ultimate in strength and durability. Our popular Tamper-Proof Key Rings® provide an added layer of protection for your most valuable assets – from keys and utility knives to medical equipment and cash tills. These high-security, stainless steel rings cannot be opened without detection, thus preventing asset substitution.

Unique ID

Every ring is stamped with a unique serial number. This permanent ID provides a tool to audit both rings and the attached assets preventing substitution.

Solid & Flexible Rings

Each size of Tamper-Proof Key Ring® is available in both solid and flexible braided stainless steel. Both solid and flex ring are sealed with our same Crimping Tool.

Smooth Seal

All styles of Tamper-Proof Key Rings® crimp to a smooth seal. Attached keys and assets are free to rotate the full 360 degrees of the ring to prevent bunching. Once broken the ring cannot be re-crimped.

Tools

Unique tools prevent the substitution of alternative key rings.

The Closing Tool

Closes and holds solid rings shut in preparation for crimping.

The Crimping Tool

Clamps down to create our smooth seal on both solid and flex rings.

The Cutting Tool

Used to permanently cut open the key ring seal in order to remove keys or assets.

Color Coded Control

The only plastic we use with our Tamper-Proof Key Rings® is the color coded tags. Five colors are available to help group key rings for quick identification.

Key & Fob Shield

Multiple shield sizes may be used to prevent unwanted viewing of your high security assets. Key Shields attach to any Tamper-Proof Key Ring® and slides over your assets to conceal their profile when locked in a SAM™.

Tamper-Proof Key Rings®

Solid Rings:

Material Stainless Steel

Ring Thickness 4mm
